Alliance Partners

Altiris strategic alliances include some of the most respected international hardware, softwa in the industry. Each of these companies has surveyed the marketplace and selected to wor multiple channels of support and confidence that Altiris software will work with their chosen

Hewlett-Packard

Altiris and HP/Compaq provide best-of-breed solutions for HP partners and customers that are designed to further simplify and reduce the cost of owning desktops, notebooks, thin clients, handhelds, and servers. Altiris is HP's client manageability partner and is a key part of the HP Intelligent Manageability strategy for the adaptive enterprise.

Dell

Altiris and Dell deliver a wide-range of systems management solutions that include client, enterprise and professional services offerings. These solutions help customers reduce the cost and complexity of management.

Fujitsu Siemens Computers

Altiris and Fujitsu Siemens Computers are working together to ensure that Altiris IT lifecycle management solutions integrate with and complement Fujitsu Siemens Computers' proven management capabilities. Fujitsu Siemens Computers also distributes and sells the entire line of Altiris solutions and suites.

IBM

Altiris Deployment Solution for Servers is now integrated with the IBM ServerGuide Toolkit 1.1 to further optimize the deployment and provisioning of IBM Servers.

Cisco

Altiris is a Cisco Technology Development Partner, working with Cisco on multiple fronts. Altiris supports Cisco ACNS (Application and Content Networking System), as an alternative to package servers for delivering software and patches in highly distributed environments. Altiris also supports Cisco Network Admission Control (NAC) to restrict network access to only those devices that meet corporate security requirements.

Intel

Altiris and Intel are jointly developing embedded IT technologies referred to as AMT and VT. The Intel AMT and VT products enabled with Altiris technology will move management capabilities from the client level to the hardware level. The new hardware will allow IT managers to discover all hardware and software computing assets, heal systems remotely regardless of the OS or system state, protect against malicious software attacks, and increase security with persistent management.

Microsoft

Altiris is a Microsoft Gold Certified Partner with a long history of managing millions of desktops, mobile devices, and servers on the Microsoft platform. Altiris' award-winning solutions tie in seamlessly with Microsoft initiatives for Software Asset Management (SAM), Increased Operational Efficiency, Desktop Deployment, and Security Audit and Compliance.

Oracle

Altiris and Oracle jointly developed Oracle's PeopleSoft Enterprise ITAM product and Altiris' PeopleSoft Foundation Suite, a combination of solutions that allows you to reconcile the financial records of IT assets in your environment with up-to-date, detailed information about how and where those assets are being used. Altiris is also part of the Oracle security initiative, and is working with Oracle and Dell to help simplify the deployment of 10g.

Philips

Philips, a leader in display technology and consumer electronics, and Altiris, a leader in IT lifecycle management, have joined forces to provide IT administrators with the best in LCD monitor management—Philips SmartManage. Philips and Altiris offer complete IT lifecycle and asset management for all the devices in your organization.

VMware

VMware and Altiris are joint development partners, working to improve manageability of the VMware virtual environments. Focusing on three key areas, Altiris supports deployment of the VMware virtual environment, awareness of VMware sessions (as reflected in hardware and software inventory), and ongoing, remote management of VMware environments.
